

Ranking the schools

Important notes to the rankings

In this table, schools are ranked (on the left hand side of the page) in descending order (from 1 to 2723) according to their academic performance as measured by the Overall rating out of ten (shown on the right hand side of the table) for the school year 2009/2010. Each school's five-year average ranking and Overall rating out of ten are also listed. The higher the overall rating (out of 10), the higher the rank awarded to the school. Where schools tied in the overall rating, they were awarded the same rank. Where less than five years of data was available "n/a" appears in the table.

Not all the region's elementary schools are included in the tables or the ranking. In some school districts that operate middle schools or junior high schools, the elementary schools may not enroll students in grade 6. Since the Report Card is based on the results of tests given in grades 3 and 6, these elementary schools cannot be included. In addition, schools at which

fewer than 15 students were enrolled in each of these grades are excluded. Private schools and First Nations operated, federally funded schools are not required to administer the EQAO tests. Since the results of these tests form the basis for this Report Card, only those schools that administer the EQAO tests could be included. Finally, also excluded are schools that did not generate a sufficiently large set of student data to enable the calculation of an Overall rating out of 10.

The exclusion of a school from the Report Card should in no way be construed as a judgement of the school's effectiveness.

IMPORTANT: In order to get the most from the Report Card, readers should consult the complete table of results for each school of interest. By considering several years of results—rather than just a school's rank in the most recent year—readers can get a better idea of how the school is likely to perform in the future.
